FOR IMMEDIATE RELEASE

Subject: Acquisition of Syndel Laboratories Ltd by Aquatic Life Sciences Ltd.

Mr. Monty Little, President and founder of Syndel Laboratories Ltd. is pleased to announce the sale of Syndel to Aquatic Life Sciences Ltd. "After 28 years of successful service to the fisheries and aquaculture sector, it is time to expand the horizons of Syndel as provider of approved fish health products both here and abroad." stated Mr. Little. "By combining the efforts of Syndel and Aquatic Life Sciences, we will be better able to respond to the needs of a growing industry." Mr. Little will remain with Syndel for a period of transition and as a stakeholder in the subsidiary company, Syndel Asia. Through the acquisition of Syndel by Aquatic Life Sciences, Syndel becomes a sister company to Western Chemical Inc. of Ferndale, Washington.

"It just makes sense." Says Mr. Steven Becker, CEO/President of Aquatic Life Sciences Ltd. "By combining the resources of the two companies, both of which have been serving the fisheries and aquaculture industry for almost thirty years, we are collectively able to focus our efforts on meeting the growing needs of our domestic and international clients". Prior to the sale, Syndel was a distributor of Western Chemical products. "The philosophies and practices of the two companies are a perfect match; they both focus on supplying quality approved products and superior service." says Mr. Becker.

Both Syndel and Western Chemical have been on the forefront of developing aquaculture chemicals and pharmaceutical products for a worldwide market for decades. "The product lines are developed with the goal of being consistent and valuable to the industry, we are market driven." Mr. Becker continues "Together our products are available in more than 40 countries around the world, through an established network of agents and distributors firmly establishing the combination of the two companies as a global leader in supplying the expanding fisheries and aquaculture industries."
